

GenAI & Agentic AI Security

Zero Trust, Threats & Attack Paths • Omer Farooq

OWASP AGENTIC TOP 10

ASI01	Agent Goal Hijack	ASI06	Memory & Context Poisoning
ASI02	Tool Misuse & Exploitation	ASI07	Insecure Inter-Agent Communication
ASI03	Identity & Privilege Abuse	ASI08	Cascading Agent Failures
ASI04	Agentic Supply Chain Compromise	ASI09	Human-Agent Trust Exploitation
ASI05	Unexpected Code Execution	ASI10	Rogue Agents

ZERO TRUST CONTROL LOOP FOR AGENTS

1 User	2 Agent Identity	3 Policy Engine	4 Risk Check	5 Tool	6 Tool / API	7 Monitor & Audit
-----------	---------------------	--------------------	-----------------	-----------	-----------------	----------------------

Verify who is asking, decide what is allowed, then act and monitor. Every step re-checks before reaching a tool: **verify, least privilege, assume breach**. The same controls extend across six layers: users, models, data, agents, tools and APIs.
